

Precision Ag Advisors Partnership Program

Benefits to Your Business

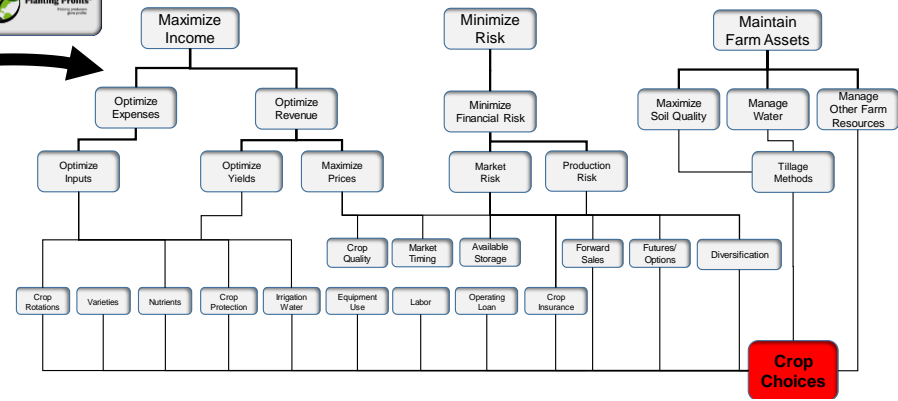

Planting Profits® is partnering with precision ag services providers to offer a new upstream production planning service. The service uses our on-line planning tool to help growers decide their crop mix. The planning service compliments precision ag and other grower services. Precision ag advisors can use Planting Profits® to extend their relationship with clients to provide a more comprehensive set of services. Benefits include:

- **Support Core Service Sales** – Providing the upstream production planning service expands customer contact and sales opportunities for precision ag services.
- **New Revenue Stream** – The production planning service can be bundled into an existing suite of services or sold as a stand-alone service. For the right type of grower, production planning will be a high-value service that growers will value and pay for.
- **Competitive Differentiator** – Delivering the production planning service either for a fee or for free to your customers is another way to compete in areas beyond price.

Benefits to Your Growers

Planting Profits® is an on-line production planning tool that helps growers find their best mix of crops and acreage. Using minimal farm data and optimization algorithms, Planting Profits quickly analyzes all production options and trade-offs between profit, risk, asset use and stewardship. Planting Profits can be used to deliver on-line or in-person planning services. Planting Profits is most beneficial for row crop growers who have some crop choices and some flexibility in their rotations. For these types of growers, Planting Profits often finds crop mixes that have 10 – 30% higher forecasted income than the grower’s intentions. It only takes 30 – 60 minutes to create and analyze a farm model. Planting Profits provides a new business opportunity ...
